You are cordially invited to:

NetGrowth 2015

Internet insights to help you make better business decisions and build your IT networks for the future.

- Current data and trends from Singapore and the Asia Pacific region

- Discussion of the next–generation of Internet addressing, IPv6, and what this means for IT departments

- Speakers from the Asia Pacific Network Information Centre (APNIC), the Regional Internet Registry for the Asia Pacific, which delegates and manages Internet number resources and publishes globally recognized Internet statistics
